

Media Exchange Ltd has been working in Hungary and in the middle-east European region providing Internet services and retail VoIP services since 2004.

We started to focus on the global wholesale market in 2005. Now we have more than 200 partners worldwide which means that global call termination is in our main portfolio.

We offer both CLI and LCR routes to every single destination on earth. We are extremely strong in Hungary and in central Europe, where we have built direct connections to most of the major national telecommunication companies.

Media Exchange has also developed "VoIP eXchange" the first hungarian traffic exchange trading portal.

Our business philosophy is to provide high quality services on affordable prices and maintaining a Network Operation Center with the fastest available response time and "quick deal" sales managers.

This basic policy is already enjoyed by 15.000 end users on our own internet network and throughout our partners.

Our network operation center works 24 hours each day, providing continuous quality control and inspection, also focusing on extremely rapid troubleshooting. This helps us to achieve more than 99% availability for all of our services on yearly basis.

We also ensure our wholesale partners that our english, german, italian, russian and hungarian speaking customer service is non-stop reachable for them.

Our backbone network has a 2N+1 backup ratio to make life even harder for our competitors.

We are looking forward to establish a mutually fruitful, long lasting business relationship with You!
